Account·product grain from the HubSpot deals, in $M. % beg. = each movement as a share of that month's beginning ARR. Monthly GRR = (beginning − churn − product churn − downsell) ÷ beginning; monthly NRR adds upsell and cross-sell. One-month rates, not annualized.

Every market missed its sales target

Net New ARR booked in October 2026 by market against each market's own plan. Europe won no new logos; its $173K is all expansion on the installed base.

Every segment missed its target too

Net New ARR by segment, stacked by market, against each segment's company-wide plan; Canada SMB netted –$11K on churn and does not appear in its stack. Variance: Enterprise –$258K · Mid-Market –$60K · SMB –$69K. There is no market × segment plan.

Card titles are October company totals for the movement; the column header is the sum of the five deals shown. 42 new-logo deals closed, 10 won (24%). 213 renewals, 23 churned.

Team attainment landed at 58% of quota: Target was 65%

Four reps exceeded quota

Rep	Role · market	Quota	Booked	Attain.	Biggest October contributions
Casey Johnson	Enterprise AE · US	$183K	$338K	184%	Harrowgate Analytics new logo ($66K); $272K expansion, $175K of it on SFDC + SAP accounts
Charlie Bauer	Enterprise AE · Canada	$183K	$301K	164%	Chesterfield Manufacturing new logo ($52K); $193K expansion on Canadian accounts
Jamie Flores	Enterprise AE · US	$183K	$251K	137%	$235K expansion on the installed base; no new logos
Hayden Kim	Mid-Market AE · US	$155K	$187K	121%	$56K in new logos plus $53K expansion on Sage Intacct accounts

Close (90–99%)

Sam Lindqvist 93% on a 50% ramped quota. Hayden Cohen finished just under 90% with the most new-logo ARR of anyone ($75K)

Behind (under 90%)

25 of 30 quota-carrying AEs, 13 of them under a third of October quota

Quota is credited on gross new ARR (new logos, upsell, cross-sell); churn and downsell are not charged to a rep. Attainment = booked ÷ ramped October quota.

Good work.

Largest November churn risks: Easton Networks $118K · Northgate Robotics $83K · Kingfisher Capital $73K · Abbotsford Capital $71K · Valemont Capital $68K

Largest November expansions: Calloway Dynamics $58K · Rockport Consulting $49K · Quarry Ventures $40K · Juniper Consulting $40K · Stanford Networks $38K

Outcomes are the deals that closed in October. No open deal was still dated October at month end, so nothing slipped; the book keeps no dated pipeline snapshot, so pulled-in and pushed-out moves are not measured. November expected = ARR × CRM stage probability.

The $386K miss was driven by the Enterprise segment

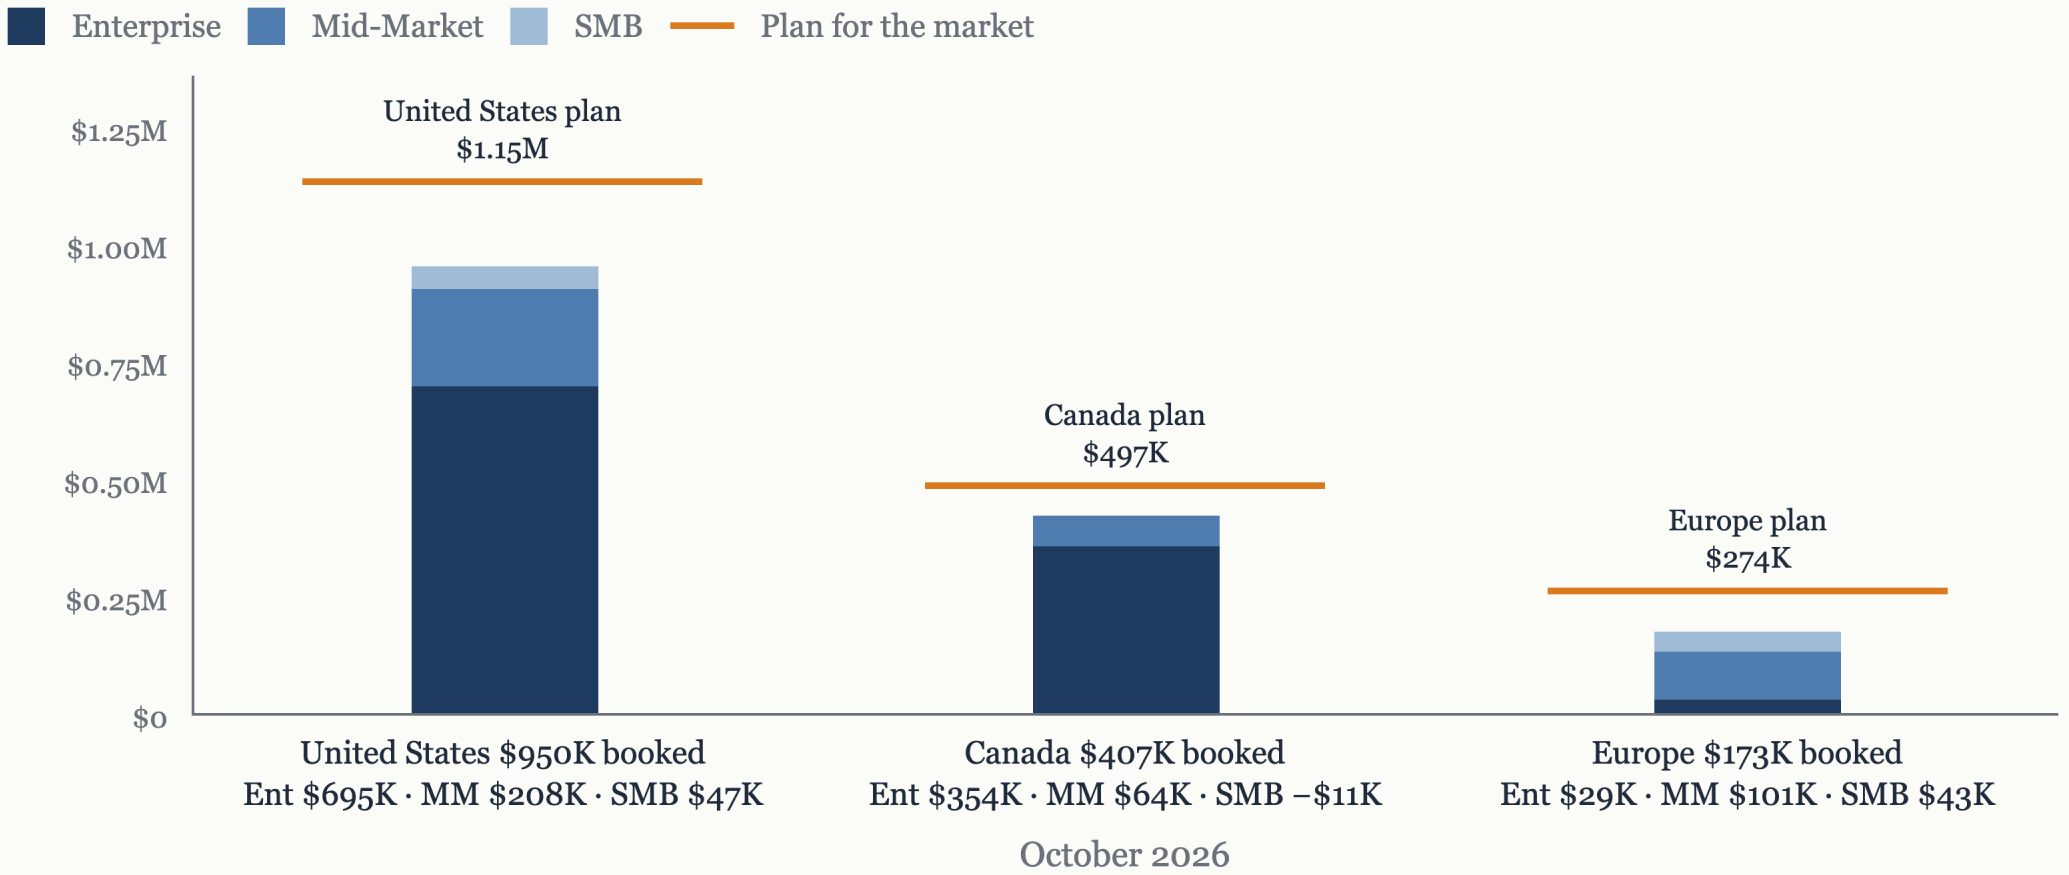

Cut	Cohort	Oct vs plan	Read
Segment	Enterprise	−$258K	Largest miss · two-thirds of the company shortfall
Market	United States	−$196K	Largest dollar miss
Market	Europe	−$101K	Worst proportionally: 63% of plan, zero new logos
Vintage	2021 + 2022	−$434K	Where the five big churns sat; 2023 (+$82K) and 2026 (+$287K) beat plan
Tech stack	Pipedrive + Xero	−$69K	Essentially no activity; SFDC + SAP (+$131K) the only stack ahead

The one-line answer

Enterprise accounts in the US, from the 2021–2022 vintages, are where October was lost.

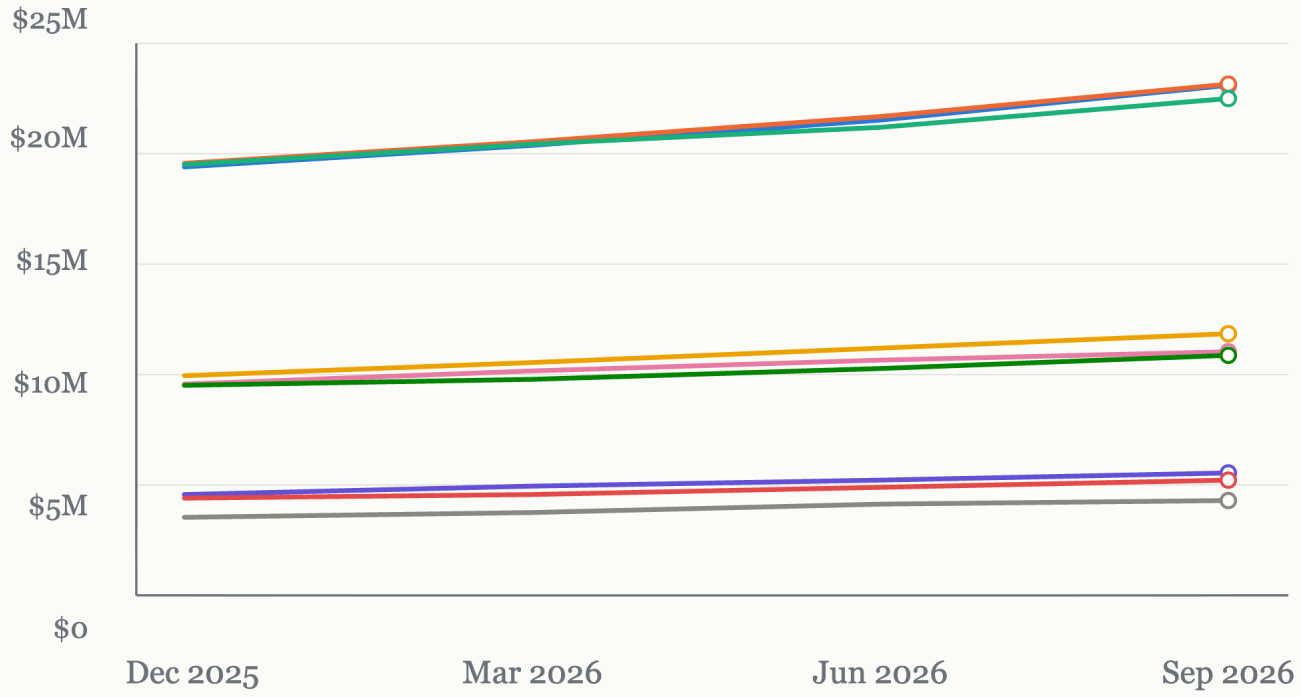

Segment and market against their own plans. Vintage and tech-stack plans are pro-rata allocations of the book, not committed plans: read those rows as direction, not accountability.

Enterprise is two-thirds of the miss

Net New ARR by market, stacked by segment, against each market's plan; Canada SMB netted –$11K on churn and does not appear in its stack. There is no market × segment plan.
